

SUBALAKSHMI V

SENIOR SOFTWARE ENGINEER

4.5 Years | Python | Data Analysis | Pandas | NumPy | AI/ML

+91 9344246863 | subalakshmi.vairaj@gmail.com | LinkedIn | GitHub

OBJECTIVE

Software Engineer with 4.5 years of experience building scalable backend systems in Python, with hands-on experience in data analysis and AI/ML integration using Pandas, NumPy, and the Claude API. Seeking to transition into a Data Science role, applying strong analytical thinking, statistical reasoning, and experience automating data validation and comparison workflows to solve real-world data problems.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript (Basic)
Data Analysis	Pandas, NumPy, Pydantic, OCR, Web Scraping, Pytest, Unit Testing
AI / ML	Claude API, ChatGPT, Prompt Engineering
Backend	FastAPI, Django, DRF, Flask, REST API, OpenAPI/Swagger
Databases	PostgreSQL, MySQL, SQLAlchemy, Alembic
Auth & Security	JWT Authentication, OAuth2, RBAC
Async & Cache	RabbitMQ, Celery, AsyncIO, Redis, Socket.IO
Cloud & DevOps	AWS (Lambda, S3), Docker, Docker Compose, Nginx, Linux, CI/CD, Git, GitHub
Blockchain	Web3.js, Smart Contracts

PROFESSIONAL EXPERIENCE

Indsys Holdings – Senior Software Engineer | Sep 2025 – Present | Automation / Label Processing

- Designed Python/FastAPI label automation platform, reducing manual effort by ~60% and processing 10,000+ async jobs daily via RabbitMQ event-based pipelines.
- Deployed Redis + Socket.IO for real-time order tracking across 200+ daily orders; orchestrated Celery workers for scheduled reporting; embedded Claude API for AI-powered QA and artwork validation.
- Systematized Excel-PDF comparison workflows using AI-powered logic, cutting discrepancy detection time by 40% and improving data accuracy across label processing pipelines.

GatesCloud Technologies – Senior Software Engineer | Jan 2025 – Aug 2025 | MLM Financial System

- Engineered scalable RESTful APIs with FastAPI & PostgreSQL supporting 50,000+ transactions — wallet management, binary tree structures, and referral logic.
- Established Socket.IO for real-time dashboards; optimized SQL queries and indexing strategies; mechanized commission payouts via Cron Jobs, achieving 99.9% uptime. Authored full OpenAPI documentation.

Applogiq – Software Engineer | Aug 2023 – Jul 2024 | SaaS / CRM Solutions

- Built REST APIs with FastAPI & PostgreSQL for CRM, e-commerce, and gaming backends; applied JWT/OAuth2 auth; deployed microservices with Docker on AWS Lambda serverless workflows.
- Executed Pytest-based unit testing and performance tuning for high-volume SaaS, reducing bug escape rate by 30%; collaborated with React.js teams to deliver seamless API integration across 5+ product modules.

Osiz Technologies – Programmer | Aug 2021 – Aug 2023 | Blockchain / Web3

- Built blockchain backends with Python, Django & DRF; leveraged Web3.js for smart contract interactions, NFT minting, and token transfers; engineered secure wallet systems.
- Optimized high-traffic dApp performance using Redis caching, cutting API response times by up to 50%; enforced data integrity via encryption and robust architecture.

KEY PROJECTS

AI Label Validation Platform

- Embedded Claude API into FastAPI for automated document validation and intelligent data comparison; Excel-to-PDF engine reduced QA effort by ~60% and detection time by 40%.

Vehicle Access Management System (TESS)

- Enterprise vehicle access platform using FastAPI & PostgreSQL managing 500+ vehicles; leveraged HikCentral OpenAPI; automated RFID/UHF tag registration with RBAC for contractors, employees, and visitors.

EDUCATION

Bachelor of Computer Science | Madurai Kamaraj University | GPA: 7.5 | Jun 2018 – Jun 2021
